

It's About Jobs.

Each day millions of Americans are struggling to find or keep good jobs that provide decent pay and benefits as well as some stability. It's our neighbors, our family members, our kids – and maybe even us. Too many jobs have gone overseas. Good jobs aren't easy to come by. The devastation caused by the economic meltdown and resulting recession has only made a bad situation worse. Join your fellow members in fighting back.

Your participation is a critical part of the effort!

The current national action is about sending a message to Washington that we need to: 1) secure our current jobs and 2) fight to ensure that as we develop the clean energy economy, the new green jobs – which are centralized in the manufacturing sector – are created in the United States.

We must have a strong manufacturing base to have a strong country. Investing in green jobs gives us the chance to secure and rebuild domestic industries that provide the quality, good-paying jobs we need.

Has your local taken action yet?

Thank you to everyone who has already participated or who is in the process of completing the action. We've generated tens of thousands of notes, but thousands more are needed.

It only takes a minute to make a difference!

Please take action today. This action is about all of us. We need to make sure Washington knows where we stand.
